

- 1) Find your car's (or your favorite car's) MPG for city and highway paste on your spreadsheet.
- 2) Find a picture of that car.
- 3) Find the national average price of gasoline and put in spreadsheet.
- 4) Find the prices (one night, one person) for at least *five* hotels or motels (try **hotels.com** ) & put in spreadsheet
- 5) Find the hotel logos and paste on your spreadsheet.

Hotel	Per Night	City MPG	Hwy MPG	NAPG
Marriott		51	48	
Hilton				
La Quinta				
Motel 6				
Hampton
