

# DIRECTIONS for GATHERING PICTURES prior to GIMP ASSIGNMENT #2 - Celebrity Magazine Cover

- 1) Open your computer's internet connection and search for pictures using Google Images.
- 2) Whenever possible, try to use transparent GIF or PNG images because it will save you a great deal of work. JPEG images have a white background which is more difficult to erase when editing pictures.
- 3) Find the following pictures (or similar) and save each to your flash drive folder:
  - a) Three Magazine Title banners (eg. Rolling Stone, People, etc)
  - b) Four to Six Celebrity Pictures
- 4) Make a folder in your GIMP images folder on your flash drive and name it Celebrity Images. Be sure to save all of the images you found today, in this folder.
