Olympic Medal Count

Using the internet and the program MS-Excel, you will make a spreadsheet showing the final medal count for the top twenty nations that participated in the 2014 Winter Olympic Games.

A. First, set up a spreadsheet that looks like this:

☆☆☆☆☆☆

☆

NATION	GOLD	SILVER	BRONZE	TOTAL	PERCENT
Russia	GOLD	SILVER	BROINZE	IOTAL	PERCENT
USA					
Norway					-
Canada					
Netherlands					
Germany					
Austria					
France					
Sweden					
Switzerla <mark>nd</mark>					
China					
Korea					
Czech Republic					
Slovenia					
Japan					
Italy					
Belarus					
Poland					
Finland					
Great Britain					
Latvia					
Australia					
Ukraine					
Slovakia					
Croatia					
Kazakistan					
TOTAL					
MEDALS					

B. Next, you will find the medal count for each nation at this website: http://bleacherreport.com/olympics/medals
Enter the information from this website into your spreadsheet for the top twenty-six medal winning nations.

- C. The next step will be to write formulas in order to calculate the **total medal count** for each country as well as another formula to calculate the **percent of total** medals each nation won.
- D. Lastly, you will need to make a **column chart showing the total medals** each country won, and a **pie chart showing the percentage** of medals each country won.
