

GIMP Skyline Directions

- 1) Open internet connection and search for pictures using Google Images
- 2) Find the following pictures and save each to My Pictures Folder:
 - a) City Skyline at night
 - b) Full Moon
 - c) A Flying Superhero
 - d) Appropriate Cartoon Character of your choice (Peter Griffin, Stewie, Squidward, etc)
 - e) Sponge Bob Squarepants face
 - f) Fireworks
- 3) Open GIMP Program
- 4) Open each picture in GIMP in order to edit each
- 5) **Select** cartoon character's head, **copy** it, and **paste as a new layer** on the Flying Superhero's Body
- 6) Select Sponge Bob's face, copy it, and paste it as a new layer onto the full moon
- 7) Re-Size Sponge Bob's face so that it fits perfectly over the moon
- 8) Now, lower the opacity of Sponge Bob's face so that the moon surface is visible below it
- 9) Paste the fireworks onto your Skyline
- 10) Once you have finished editing each picture, you need to save each one of them TWICE:
 - a) Name and Save each picture as a GIMP **.xcf** file
 - b) Then name and save each picture as a **.jpg** file
- 11) Next, open the Skyline picture.
- 12) Now open the Moon Face JPEG and the Peter Super Hero JPEG files
- 13) Select the Super Hero JPEG and paste it as a new layer onto the Skyline
- 14) Now select the Moon Face JPEG and paste it as a new later onto the Skyline
- 15) Re-Size and Move each picture around on the Skyline.
- 16) When you are satisfied, save this GIMP Skyline twice: once as a GIMP **.xcf** file
- 17) Lastly, flatten the layers and (VERY IMPORTANT) save the file as a as a **.jpg** file **with a new name using the word FLAT.**
